Professional Experience

2026 – Now

IT Support & Network Support

SETEC Institute | Phnom Penh

IT Support

- Provided technical support by troubleshooting and resolving hardware, software and network issues.
- Installed, upgraded and configured hardware including RAM, SSDs, monitors and peripherals.
- Installed and configured Windows, applications and system updates.
- Installed and maintained Microsoft Office, Adobe Creative Suite (Photoshop, Illustrator, InDesign, After Effects, Premiere Pro) and Autodesk applications (AutoCAD, Revit, 3ds Max).
- Performed PC cloning, system recovery, data backup and restoration.
- Installed network cabling, switches, routers and network printers; configured shared folders and permissions.
- Diagnosed and resolved LAN connectivity issues and gave end-user support.
- Configured CCTV cameras using IP Config Tool, SADP Tool and PoE switch.

Network Administration

- Designed network topology diagrams and virtual lab environments using GNS3.
- Configured routers, switches, VLANs, IP addressing, static and basic dynamic routing.
- Tested connectivity with Ping and Wireshark and verified end-to-end communication.
- Configured Windows Server and Active Directory: created user accounts, joined computers to domains and managed user access.
- Configure file server for user access base on permission and user advance permission.
- Configured printer sharing to allow users on the local network to print documents.

Linux System Administration

- Managed users, groups and file permissions; configured password policies, UMASK, ACL,
- Created scripts and performed basic remote system administration.

2025 – 2026
